NATIONAL FIELD WORKSHOP ON IRON ORE DEPOSITS OF HOSPET-SANDUR SECTOR

The Geological Society of India, Bengaluru is organising a National Field Workshop on Iron ore deposits of Hospet-Sandur Sector during 11th to 14th December 2019 at Hospet, Ballari district, Karnataka covering the following themes:

1. Genetic Aspects of Iron ore
2. Surface Geological Mapping and Assessment of Geological Resources.
3. Prospecting of Iron ore Deposits
4. Economics and Preparing a Bankable Document
5. Methods of Mining
6. Beneficiation of Iron Ore

The workshop is aimed at training and introducing amateur geologists and teachers/research scholars to deal with different aspects related to prospecting and exploitation of mineral resources – specifically iron ores. It will be conducted through selected field traverses during the forenoon followed by erudite lectures on related themes by the eminent experts during the post lunch session. The workshop will provide an unique opportunity to the participants to interact with professional geologists/mining engineers/metallurgists/environmentalists and gain the much needed practical knowledge in dealing with iron ore deposits through interactive sessions.

Interested participants both from Universities, Government Organisations and Public as well as Private industries, may apply on the prescribed format (refer to the Society’s website for details) with registration fee of Rs.3500.00 payable to the Geological Society of India, Bengaluru. A maximum of thirty persons will be accommodated for the workshop on first cum first serve basis. The last date of registration is 25th November 2019.
